

1. To download the Energy3D program, go to the following website:  
<http://energy.concord.org/energy3d/>
2. Once there, choose the installation fit for your operating system
3. Open the Energy3D setup, and click install; the program will be accessible through an icon on your desktop

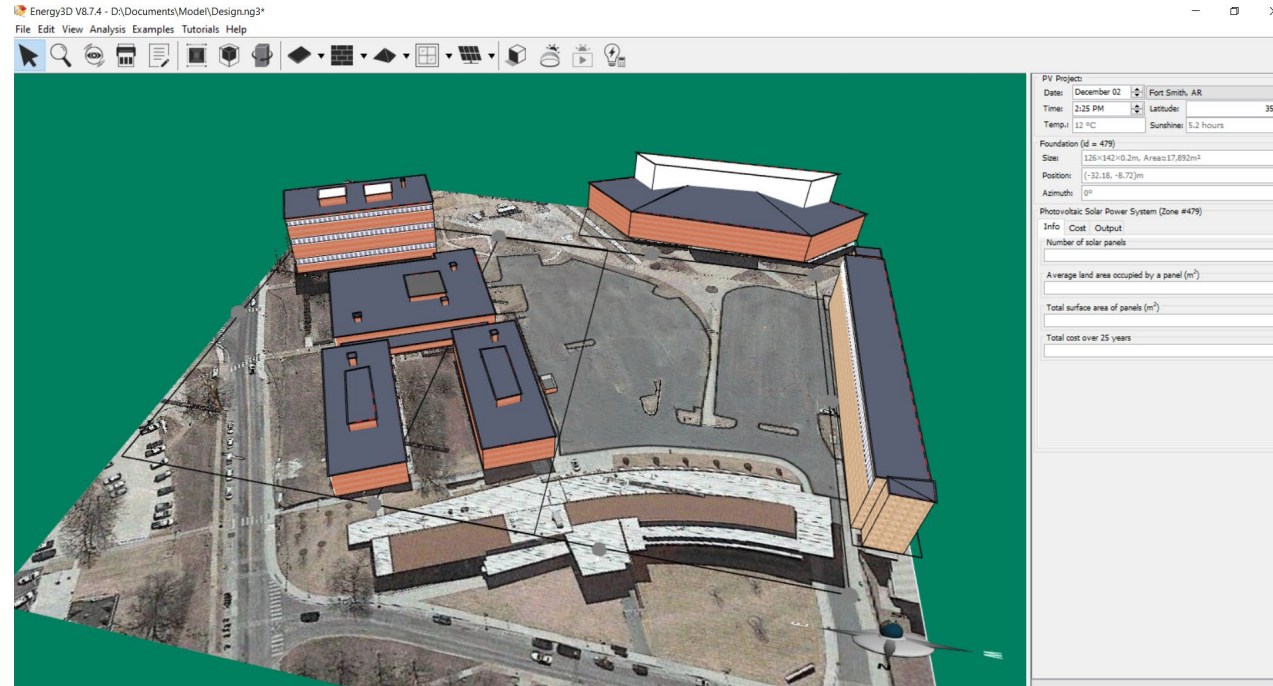

After you have installed and opened Energy3D, navigate to the, “File” option in the top right corner and click, “Open”

Select the, “Design\_Contest.ng3” file, which can be found on our website:

<https://sidilab.net/sidi-resources/cad-based-solar-design-contest/>

Once you have downloaded and opened the Design Contest file, you should see the model in the image below

If so, you are ready to begin the task – good luck!
